# 2004

## Biography

### Carroll Dudley

Senior Advisor, SSAI

Mr. Carroll Dudley has 32 years experience at GSFC. After receiving a BS in Electrical Engineering, Mr. Dudley joined the GSFC staff and held a series of increasingly responsible positions in the mission operations directorates. Mr. Dudley served as the Mission Operations Directorate's Ground Systems Development Manager for the Hubble Space Telescope. He served as Chief of the Mission Operations Division, prior to becoming Deputy Director of the Mission Operations and Data Systems Directorate. With the GSFC reorganization, Mr. Dudley became Deputy Director of the Applied Engineering and Technology Directorate, an organization of 1200 Civil Servants plus 500 contractors, with oversight for designing, building and testing scientific spacecraft systems and developing spacecraft systems technology.

Since retiring from GSFC in 1998, Mr. Dudley has worked with local GSFC contractor teams involved with Earth Observing Systems and the James Webb Space Telescope (JWST). After joining Science Systems and Applications, Inc. in 2000, he served as the Program Manager of the GSFC Code 900/600 contract during transition from the previous contractor and the first two years of the contract. Mr. Dudley is currently a senior advisor to SSAI where he is involved with overseeing the Quality Management System and supporting other company initiatives.
